

Get Your Business Heard

Talk 'N Communications

Get your message heard by your clients and prospects. Most people remember 10% of what they read, 20% of what they see & read but up to **50% of what they hear, see and read!**

Corporate Podcasts

Do you have something important to say about your business or service?

Whether it is regular information or a one off event we can help you get your message heard with a podcast made specifically for you.

Web Audio on Your Website

Introduce yourself and your staff, your product or service right on your web page. People do business with people, not websites or brochures. Connect with your web visitors personally.

Audio Email Signature

Are you missing out on differentiating yourself from the masses? Make a personal audio connection with your email recipients and enhance your relationship building.

Boost Your Training Offer

We are all busy. Let your training audience really absorb your training materials with MP3 audio they can listen to while commuting or at any other time suitable to them. We help you add value to your training materials.

Talk'N Communications is a web audio specialist.

*Our **purpose built voice over studio** is fully equipped to make you sound good in front of your clients and business prospects.*

*New technologies and techniques make it **affordable for small and medium sized businesses** to use audio techniques once the preserve of big business to get their messages heard and understood.*

*Contact Talk'N Communications to find out how your business can **benefit at a surprisingly affordable cost!***
